

# THE MAKING OF RS SPEAKERS

DYNAMIC - ENERGETIC - ALIVE

## **CLOSE YOUR EYES – AND THE ILLUSION IS PERFECT!**

We love music – not least when played live. When creating the GamuT RS series, we wanted to give you speakers so close to listening live, that you can't hear the difference.

It took a lot of hard work and frustrations. We had to use everything we know about acoustics, materials and the human interpretations of sound.

The GamuT RS series is the materialization of all our know-how and professional approach to music reproduction.

These pages tell the story of the making of the RS series – from thin slices of wood to solid, beautiful enclosures equipped with the best possible units, electronics and cabling. We hope you like the story!

Yours,  
*The GamuT team*

## THIN SLICES OF WOOD...

The high quality veneer is produced from first class birch and ash tree by the Danish company Kvist Industries in Latvia. The veneer is shipped to Denmark where the best ones are handpicked to make a career as GamuT RS-speakers.

## SPECIAL TREATMENT

The handpicked veneers get fantastic treatment in the formpress at Kvist Industries. Tons of pressure and lots of heat transforms the veneers to solid planks of plywood with the very qualities that in combination with intelligent design makes the perfect loudspeaker enclosure.

## **STRONG, BEAUTIFUL – AND IN GREAT SHAPE**

The cabinets of the GamuT RS-series consist of massive pieces of plywood made from as many as 28 pieces of veneer formed into the unique and characteristic RS design. The construction is strong, and the intelligent design contributes to the speakers' dynamic and natural sound.

### **HANDMADE BY PROFESSIONALS**

The assembly is in the hands of trained professional specialists. When they are not working with GamuT speakers, these hands create some of the Worlds finest furniture.

### **FORM AND FUNCTION – INSIDE AND OUT**

The skeleton is not here only to hold the front. Every detail has a function in creating the awarded balance between damping, and dynamics, which is so characteristic for the RS series.

### **BEAUTY ON THE OUTSIDE STARTS WITH BEAUTY ON THE INSIDE**

It's almost a shame that the inside beauty of the RS isn't visible when the speaker is finished. But only almost. Because the inner beauty is to be enjoyed while listening to your favorite music.

## ALMOST READY ...

Here they are. Almost finished and ready to get painted with different colors – and to be installed with carefully selected and special developed equipment.

Before the RS speakers can be shipped to music lovers around the world, we add the drivers, tweeters, crossover, cabling, terminals, bassports, – and the heavy base that isolates the speaker from the floor.

Every part including the tweeters and drivers are designed and produced after GamuT's unique specifications.

## BEAUTIFUL DETAILS

◀ Every single part of the RS is designed and build especially to look good and sound fantastic. - have you ever seen bass ports this beautiful?

---

The tweeters and drivers are developed on top of Scanspeak topmodels – build to meet unique specifications from GamuTs development team to get the best out of every Tune in your favorite music. ▶

## **RS TOPMODEL IN GOOD COMPANY AND READY TO BLOW YOUR MIND!**

The RS9 is probably the best speaker ever created when it comes to giving music lovers perfect soundstage, fantastic dynamic and the feeling of being where the music is played—live or in the studio.

If the speaker wasn't so beautiful, we would suggest you closed your eyes and let your ears and mind take you to the heaven of music.

# GAMUT IS BASED ON GREAT IDEAS, MINIMALISTIC DESIGN AND MAXIMALISTIC PERFORMANCE

## THE LOBSTER CHAIR

Perfect for listening. Build by the same hands,  
that builds the RS speaker cabinets.  
– ask for it at GamuT
