

HEIMDALL 2 iKABLE

Thanks to recent technological advances, we are now able to carry the most important contents of our lives in our pockets. For audiophiles, a large portion of that content is music. Now, with Nordost's Heimdall 2 iKable, the digital files in your pocket aren't only portable, but they can be played with the quality you've come to expect from your own hifi system.

The new Heimdall 2 iKable benefits from the years of research and development Nordost invested in perfecting its second generation Norse series. This cable consists of 4 silver plated 99.99999%, solid-core 24 AWG OFC conductors. The conductors are suspended in a virtual air-dielectric, which is achieved by employing Nordost's proprietary Dual Mono-Filament technology. A precision FEP tube is then extruded over the conductors. FEP is the most effective insulation in the industry due to its low loss signal and high thermal efficiency. When FEP is used in conjunction with Dual Mono-Filament technology, the result is indisputable: exceptional transient response, low resistance and minimal mechanical dampening.

Maintaining uniformity with the rest of the Norse 2 family, the Heimdall 2 iKable utilizes mechanically tuned lengths. These

lengths are scrupulously determined to reduce internal microphony and high-frequency impedance resonance.

The Heimdall 2 iKable is the perfect solution for today's modern hifi enthusiast. It is made specifically for auxiliary inputs in aftermarket radios, car and home audio stereos, and is compatible with all portable audio devices. The Heimdall 2 iKable ensures that you will never have to suffer through substandard sound again, regardless of your location.

Portable audio – elevated sound.

- 4 x 24 AWG stranded silver-plated 99.99999% OFC conductors
- Dual Mono-Filament technology
- High performance, low dielectric FEP insulation
- Mechanically tuned lengths
- Handcrafted in the USA
- Gold plated, full metal jacket shell connectors available in:

3.5mm stereo mini (Neutrik) → 3.5mm stereo mini (Neutrik)

3.5mm stereo mini (Neutrik) → 2x XLR (Neutrik)

3.5mm stereo mini (Neutrik) → 2x RCA (Nordost MoonGlo)
